

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-21. (Canceled)

22. (Previously Presented) A device, which comprises two or more carbon nanotube structure layers comprising carbon nanotube structures in which a network is formed by plural carbon nanotubes intercrossed.

23. (Previously Presented) The device according to Claim 22, wherein a functional layer is formed between at least two carbon nanotube structure layers.

24. (Previously Presented) The device according to Claim 23, wherein the functional layer contains a functional object, and some carbon nanotubes contained in both the carbon nanotube structures facing with the functional layer therebetween are electrically and/or magnetically connected through the functional layer.

25. (Previously Presented) The device according to Claim 22, wherein at least some of the carbon nanotube structures function as conductive wiring.

26. (Previously Presented) The device according to Claim 22, wherein at least some of the carbon nanotube structures function as planar electrodes.

27. (Previously Presented) The device according to Claim 22, wherein at least some of the carbon nanotube structures function as device circuits.

28-29. (Canceled)
